FOR IMMEDIATE RELEASE**Global Grange Launches LivestockOfTheWorld.com: An Innovative Platform Expanding Livestock Knowledge**

Medford, OR - October 1, 2023 - Global Grange Inc., a trailblazer in agricultural technology, is thrilled to announce the official launch of LivestockOfTheWorld.com, an online encyclopedia that serves as a comprehensive resource for exploring the vast world of livestock breeds.

Under the leadership of John Andresen, CEO of Global Grange Inc., LivestockOfTheWorld.com represents the culmination of a dedicated effort to cultivate knowledge and appreciation for livestock. With meticulously documented information on over 3,300 breeds and a commitment to continuous updates, the platform stands as an indispensable tool for anyone intrigued by the fascinating realm of livestock.

"The breadth of livestock breeds is astounding," says Andresen. "The intertwined history of mankind and livestock is profound. Livestock has shaped human history, and conversely, human civilization has influenced the development of livestock. From the tales of shipwrecked horses to the peculiarities of fainting goats and even the curious cases of glow-in-the-dark pigs and cattle with inflated horns, the stories and histories of livestock breeds are endlessly fascinating and often unexpected."

LivestockOfTheWorld.com provides in-depth insights into the characteristics of each breed, covering their origin, history, physical attributes, temperament, conservation status, and uses. Through captivating photographs and engaging content, users are invited to gain a deeper understanding and appreciation for the unique contributions of each breed.

Developed by Global Grange Inc. a leading agricultural technology company committed to empowering and connecting local farms to consumers, LivestockOfTheWorld.com is a testament to the company's dedication to driving success for farmers.

Andresen concludes, "The journey of LivestockOfTheWorld.com is ongoing. There is always more to discover about existing breeds, and new breeds are continuously being found or developed."
